PostgreSQL Remote Control

TITRE : temBoard

SOUS-TITRE : PostgreSQL Remote Control

DATE: 17th march 2017

TEMBOARD

... PostgreSQL Remote Control

WHO AM I ?

- Jean-Paul Argudo ("jpa")
 - using and advocating PostgreSQL since 2000
 - PostgreSQL France co-founder (2004)
 - and then PostgreSQL Europe (2008)
 - CEO @dalibo since 2005
-

THE NEED

- manage production PostgreSQL servers
- all-in one web platform
- easy, extensible, pluggable
- PostgreSQL licence

Let's connect

SETUP

- Users : global / local admin
 - "Instances" == PostgreSQL servers
 - Users & "Instances" groups
-

INSTANCES

Your browser does not support the video tag.

WORK IN PROGRESS

- Automated alerting mechanism
 - Maintenance plugin
 - PITR plugin (pitriery)
 - Rewrite of the whole interface!
-

ARCHITECTURE

TEMBOARD-AGENT

- Daemon / Scheduler / Workers
 - Python 2.6/2.7 & PostgreSQL >= 9.4
 - embedded HTTPS server (SimpleHTTPServer)
 - embedded PostgreSQL connector
 - REST API / .ini config file
-

TEMBOARD

- web interface
 - Python 2.7
 - dependencies: psycopg2 / tornado / SQLAlchemy
 - bootstrap3 / jquery / Chart.JS / dygraph
 - Plugins architecture / .ini config file
-

temBoard

REPOSITORY

- meta-data and metrics storage
 - requires \geq PostgreSQL 9.5
-

CAVEATS

- Linux support only
 - PostgreSQL >= 9.4 on monitored PGs
 - Python 3 : planned
 - WIP for version 1.0 : few weeks to go
-
